# ABOUT US

Currently, by marketing top-quality products supplied by renowned global companies, as well as implementing a well-developed quality management system, INATECH Packaging is the only provider offering a complete range of protective packaging and insulation materials in its product portfolio.

INATECH Packaging is constantly focused on providing the most innovative solutions, based on quality and new technologies. Moreover, the company is closely interested in environmental protection, which is why a significant portion of INATECH's products are entirely recyclable.

# VISION, MISSION & VALUES

INATECH Packaging has aimed since its foundation to become a regionally recognized leader in the distribution of protective packaging, offering innovative and sustainable solutions that effectively protect goods and support the sustainable development of our customers' businesses.

Our mission is to provide superior quality protective packaging tailored to the specific needs of our customers to ensure the safe transport and storage of their products. We are dedicated to providing exceptional service, customized solutions and ecological products, thus contributing to the protection of the environment and the sustainable success of partner businesses.

Respect and fairness, engagement, team, adaptability and vision are the key elements in how we do business.

## **IFOAM AG**<sup>®</sup> Intelligent Foam

IFOAM AG is an innovative manufacturer of customised protective packaging with extensive experience in the processing of technical foams and other plastics and cardboard materials.

## **INATECH**<sup>®</sup> Packaging Supplies & Equipment

*It's all about quality!*

INATECH PACKAGING supplies the widest range of protective packaging with fast delivery from stock. You can rely on us for product protection, whether they are stored or in transit.

## **ISOTECKLINE**<sup>®</sup> PROFESSIONAL UNDERLAY

The ISOTECKLINE project was developed to provide professional solutions in the field of construction insulation. Our clients have access to a portfolio of professional products manufactured in Romania.

# SUSTAINABILITY AND CIRCULAR ECONOMY

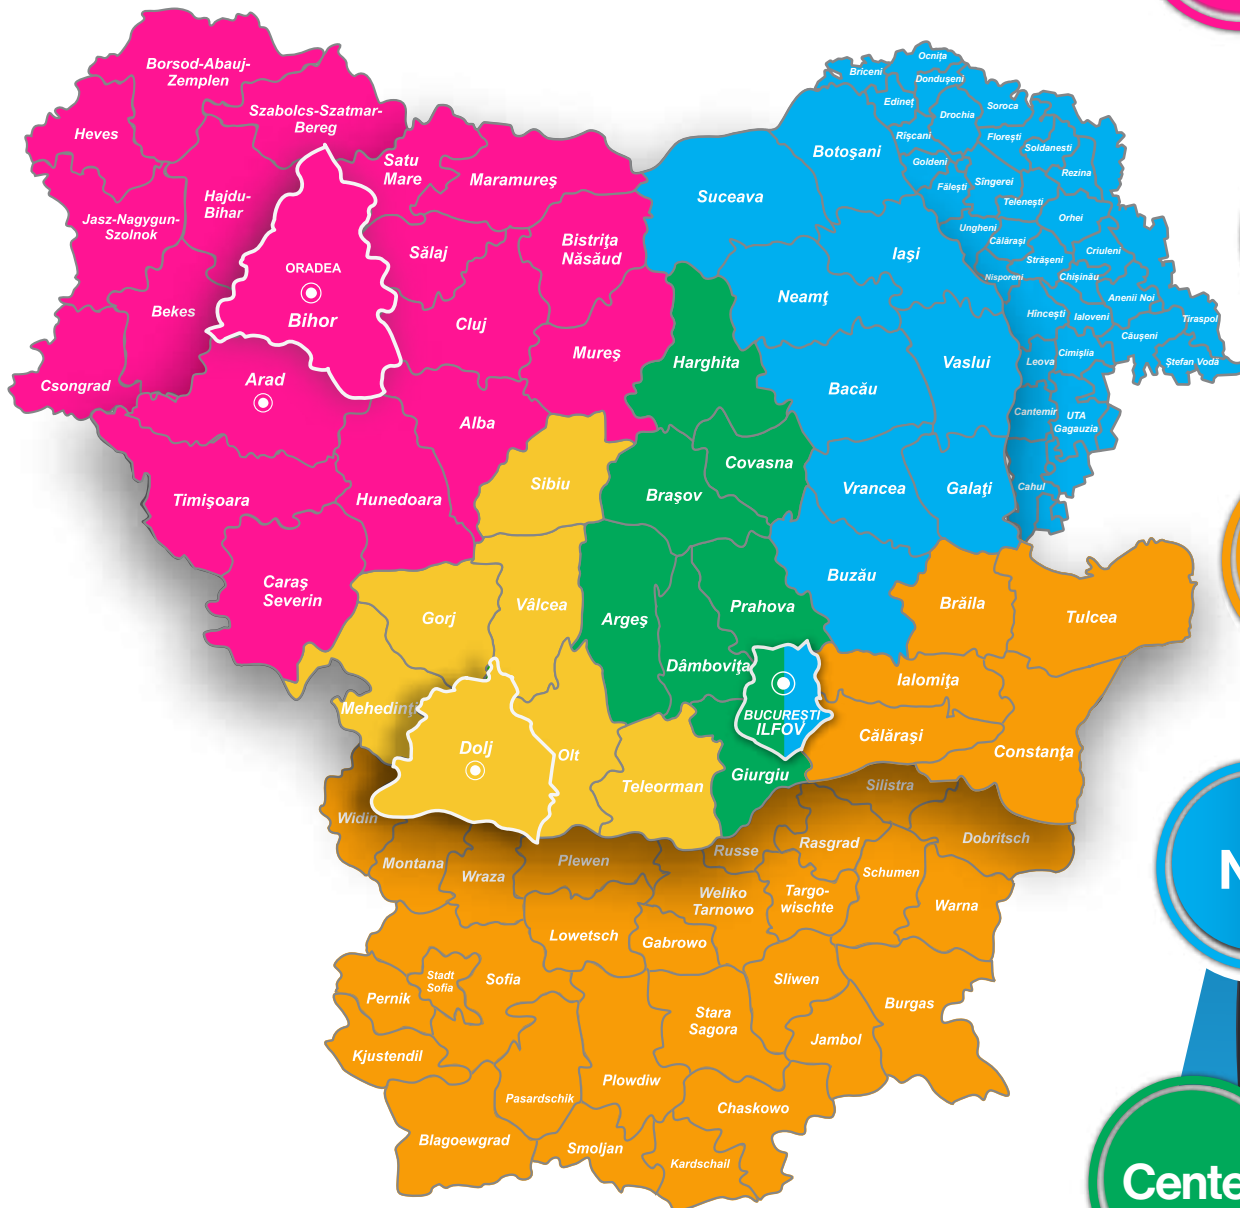

✓ Sustainable development and environmental protection are essential principles in the society we belong to. INATECH Group respects the environment we live in by implementing a responsible waste management policy, allowing for the recycling and reconditioning of 95% of the waste from expanded cellular foams. Furthermore, our company provides products that are 100% recyclable.

# SUSTAINABILITY AND CIRCULAR ECONOMY

- ✓ IFOAM AG, part of the INATECH group, obtained the environmental authorization for the collection and processing of plastic waste. IFOAM AG bought equipment for processing waste and transforming it into recycled plastic granule raw materials, such as: plastic mill/shredder and extruder for the production of recycled plastic granules.
- ✓ Social responsibility represents something more than a business trend for the Inatech group. It represents the commitment assumed by us to behave responsibly towards society and the environment, improving the life of the community.
- ✓ Constant efforts are made to secure a sustainable production, which ensures the preservation and conservation of the environment for future generations. This being possible through the partnerships developed in the industry in which we operate, involving the entire distribution chain, in our common desire of the proposed circular economy.
